Improved drawing registration: Get more accuracy out of your drawings. Use the improved accuracy capabilities in AutoCAD to more precisely place parts and features in a model that can be improved later. For example, Autodesk Map 3D and Map2 3D now use an improved Z-axis registration to register map data and design models to the workplane. (video: 1:23 min.) Improvements in geometry: Build high-quality meshes for efficient and precise representations of complex, high-detail models. (video: 1:37 min.) New, improved features for usability and efficiency: Live status indicators show you when drawings are ready and you can access commands on demand. (video: 2:07 min.) AutoCAD Raster (and related features): Rapidly and easily generate PDF files and reduce file sizes. In addition to the PDF export improvements in the Raster toolbar, you can now also adjust the size of the exported image and create other options to tweak the final PDF. (video: 1:23 min.)
